CONTRACTOR	Hammaker East LTD
CONTRACT COST	\$35,295

PROJECT DETAILS

- East Buffalo Township has contracted with Hammaker East LTD for Bituminous Fiber Reinforced Seal Coating.*
- The Township Public Works Department will prepare roadways prior to Hammaker East performing seal coating. Preparation activities may include, but are not limited to, tree trimming, grading along road edges and maintenance of berms.
- Access to driveways may be temporarily impacted for one day during seal coating process. Motorists may experience intermittent traffic delays due to temporary changes in traffic patterns due to partial or full road closures.

* Bituminous Fiber Reinforced Seal Coating is a modification of chip-seal technology. It is a combination of fiber strands between two layers of polymer-modified asphalt emulsions and aggregate, which creates a surface membrane that extends the life of a road. Fiber Reinforced Seal Coat bonds well to asphalt, forms a waterproofing barrier, reduces repairs and, although it cannot completely stop cracking from forming; it can delay the occurrence of reflective surface cracking.

For more information, call the Township at 570-523-6320.

The Township recognizes that construction may cause inconveniences for residents and motorists. We appreciate your patience and courtesy as we work to make these road improvements.
